

TMS 402/602-16

BUILDING CODE REQUIREMENTS AND SPECIFICATION FOR MASONRY STRUCTURES

NEW!!

For the first time, TMS 402/602, Building Code Requirements and Specification for Masonry Structures, has been published solely under the banner of The Masonry Society. This Standard was previously published jointly with the American Concrete Institute and the American Society of Civil Engineers. This change recognizes The Masonry Society as the accepted professional organization of the masonry industry.

The TMS 402/602 contains changes for ease of use, including:

- Removing redundancy between the Code and Specification
- Simplifying Testing and Inspection Quality Assurance Tables
- Simplifying prescriptive requirements into Table form
- Introducing requirements for Field and Lab Technician Certification

The expanded commentaries for both the Code and Specification provide insight on the intent of the code and clarify interpretation of globally written code language. Purchasing a copy of this code-referenced material standard will keep the user abreast with the latest masonry technology.

Price: \$150.00 • 8 1/2" x 11" Publication

2015 MASONRY CODES AND SPECIFICATIONS COMPILATION

This compilation serves as the perfect reference for contractors and inspectors as it provides required masonry design and construction provisions in one book.

This newest compilation is produced with The Masonry Society (TMS) and the International Code Council (ICC) and includes masonry portions of the:

- 2015 International Building Code
- Code Requirements for Determining Fire Resistance of Concrete and Masonry Construction Assemblies (ACI/TMS 216.1-14)

Also included in its entirety:

- 2013 Building Code Requirements for Masonry Structures (TMS 402)
- 2013 Specification for Masonry Structures (TMS 602)
- Direct Design Handbook for Masonry Structures (TMS 0403-13)
- Standard Method for Determining Sound Transmission Ratings for Masonry Walls (TMS 0302-12)

644 Pages • Price: \$170.00 • 8 1/2" x 11" Publication
