Garden Grove High School Michael A. Monsoor Memorial Stadium is a 3,500-seat athletic facility that features a new concession stand built with concrete masonry units. The concession stand consists of new restrooms, ticket booths, and storage area.

Eight inch colored precision masonry units and eight inch colored split-face units were used in the construction of the concession stand which features a plaque that will forever honor the memory of alumnus and Medal of Honor recipient Michael Monsoor and his heroic actions.

Concrete masonry units were selected for inherent thermal mass qualities and durability, serving as an ideal sustainable building material. This is not only an aesthetically appealing structure, but will also provide a warm and safe gathering place for the home and visiting teams during various sports activities.

Construction by a signatory masonry contractor using members of Bricklayers & Allied Craftsmen Union Locals
