

ASSESSMENT AND RETROFIT OF MASONRY STRUCTURES

The purpose of this book is to provide background reference material and guidance to design professionals, building owners, and contractors confronted with addressing existing masonry construction. Information related to construction characteristics, typical material properties, and analytical approaches are included for historic, transitional, and modern masonry construction typologies. The main focus of the book is structural stabilization, strengthening, and retrofit with maintenance and serviceability items (such as water penetration and cleaning) addressed as subtopics.

The book incorporates discussion on:

- The evaluation and retrofit process.
- Site investigations and analysis.
- Retrofit.
- Monitoring.
- Maintenance.

460 Pages

Price: \$180.00
