GANAHL LUMBER
COSTA MESA, CALIFORNIA

Owner
Ganahl Lumber Company
Costa Mesa, CA

Ganahl Lumber was built to create a centralized location providing building supplies to the local and surrounding communities. The use of concrete masonry units (CMU) was a logical choice for the structure.

Architect
Ware Malcomb
Irvine, CA

The masonry design incorporated tan and dark gray split face block units, in a running bond pattern, with a red CMU band. Tan split face recessed units also contribute to the architectural character and aesthetics of this lumber and hardware supply store.

Project Architect
Richard Gardner

CMU's were selected for this project for their long-term durability and the opportunities it presented in the variety of colors and textures available. This color variation and texture contrast provides repetitive symmetry throughout the building.

Structural Engineering Firm
Englekirk Structural Engineers
Los Angeles, CA

The tan and dark gray colors have a warm, natural tone that harmonizes well with the native landscaping, while its earthy roughness adds interest and strength to the structure.
