

REINFORCED CONCRETE MASONRY CONSTRUCTION

# INSPECTOR'S HANDBOOK

ELEVENTH EDITION

**M**asonry design consists of a variety of materials combined to provide a structurally safe and aesthetically pleasing facade. In order to assure that the materials and installation exceed the minimum design requirements a Quality Assurance program must be established.

A Quality Assurance program must be defined in the contract documents to answer questions such as “how to verify”, “what method”, “how often”, and “who determines acceptance”.

The complexity of masonry design varies from project to project, so must the extent of the Quality Assurance program. The contract documents must indicate testing, Special Inspection, and other measures required to assure that the Work is in conformance with the project requirements.

Every inspector, designer and contractor should have a copy of this important publication, which includes:

- **Inspection**
- **Materials**
- **Quality Control**
- **and much more**

**448 Pages**

**Price: \$49.95**

# MASONRY INSPECTOR'S WORKBOOK

**T**his workbook is a compilation of questions developed from material in the Reinforced Concrete Masonry Construction Inspector's Handbook, 11th Edition.

Those preparing for the ICC Structural Masonry Special Inspector certification examination will find this workbook invaluable as a self-study guide or as a supplement to a classroom environment. Successful completion of this workbook significantly enhances the technical knowledge of an entry level individual preparing for a career in the field of masonry inspection. There is an answer key cross-referenced to the material in the Reinforced Concrete Masonry Construction Inspector's Handbook, 11th Edition.

Questions in the workbook cover:

- Reinforcing Steel
  - General Construction
    - Quality Control
      - Special Provisions
        - Grouting of CMU
          - Inspection
            - Materials
              - Standards

144 Pages

Price: \$29.95
